MILITARY TRAINING COMMAND

Kali Special Operations Legion, Headquarters

Foreword by the Commander

1. PURPOSE

Document KSOL-BT 1-1A (Basic Training Manual) serves the purpose to provide new cadets and instructors to be familiar with the faction's conduct and operational dynamics.

2. SCOPE

This document covers basic orientational sections and basic combat techniques, movements, nomenclatures, and many more.

3. What is our definition of milsim?

We at Kali Special Operations Legion are a military simulation faction. For our nature of milsim, we are a fun, easy-to-adapt, and newbie-friendly but as members rise through the ladders of the faction they are forged to adapt to semi-realistic milsim aspects, discipline and moral integrity.

General, Kali Special Operations Legion
Commander
'Obi' Aka Vandam

APPENDIX 'A'

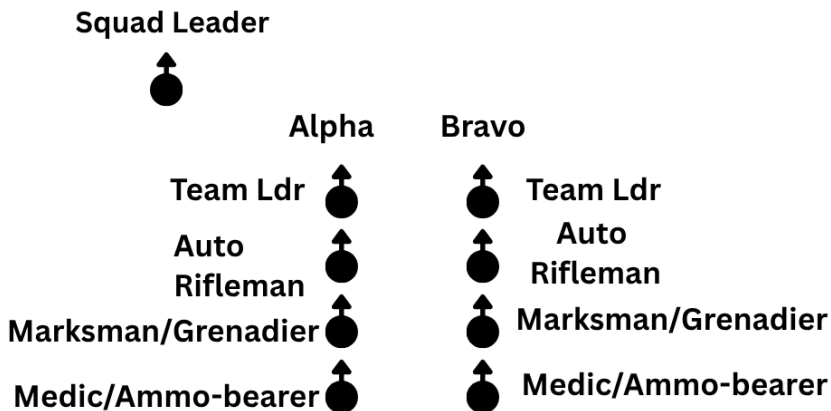

Orientation

AA01. Unit Structure

Kali Special Operations Legion is an army-level battle formation. We are roughly chained along as the following order:

You can access/view our current ORBAT (Order of Battle) at [<https://ksol-hq.vercel.app/appointments.html>].

SQUAD STRUCTURE [+ Revision date: 09/14/2026]

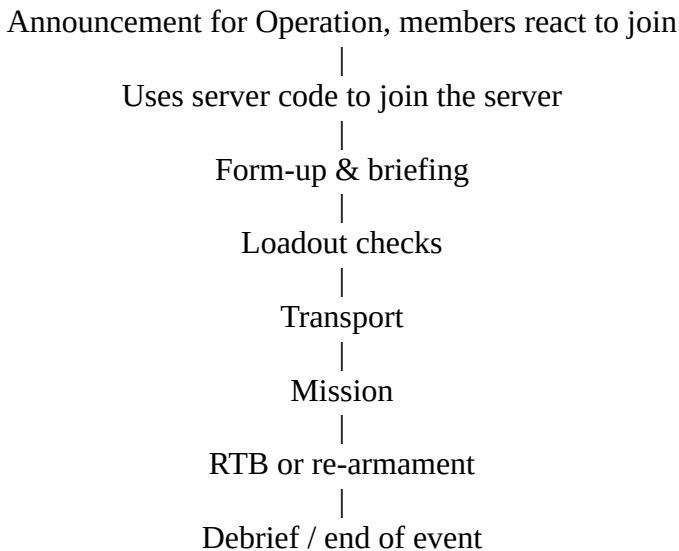

Every squad will have **(9)** men at full strength. Each Squad will be divided into **2 teams** with one **team leader** each.

Squad Leader (SGT/SSG)

Team Leader (LCPL/CPL)

AA02. Event Direction & Flow

We host and organize events in a coordinated sequence of flow to ensure easy, professional, and curated event structure. The standard sequence (until said otherwise) is:

Members are expected to behave professionally during the whole course of operation.

AA03. Instructor's Role

During the session of Basic Training, the instructor is in-charge of the training facility until a high-command supervises righteously intervenes.

APPENDIX 'B'

Interactions & Interfaces

BA04. Inventory & Logistic management

<Under development> <To be added soon>

APPENDIX ‘C’ Communication

CB05. Purpose

The purpose of Appendix ‘C’ is to ensure that KSOL members can communicate clearly and efficiently during operations.

A good combatant must be able to identify and remember callsigns, contact the correct station, transmit concise messages, acknowledge reports, report their status, request assistance, ask for clarification, and maintain radio discipline.

“A clear communication is more valuable than constant communication”

CB06. Common Callsigns (Non-phonetic)

Callsigns are used to distinguish personnel, vehicles, team, elements etc during an operation.

Callsign Suffix/ common id	Usage
Command Actual	Command station
Operation Control	Operation coordination
Strike ...	Main assault element(s)
Overwatch ...	Marksman/Sniper/Recon
Viper.../Angel...	CAS airship/ CAS element
Hammer...	Anti-tank/Heavy weapon
Hawk/Raven/Chalk	Transport element (rotary wing)

CB07. Callsigns (NATO-Phonetics)

Alpha	November
Bravo	Oscar
Charlie	Papa
Delta	Quebec
Echo	Romeo
Foxtrot	Sierra
Golf	Tango
Hotel	Uniform
India	Victor
Juliet	Whiskey
Kilo	X-ray
Lima	Yankee
Mike	Zulu

CB08. Callsign Recognition

Combatants must be able to remember assigned callsigns for themselves, allies, stations and other elements.

CB09. Standard Transmition Format:

<Called Station/reciever>, <Sender/you> :message:

For example: "Overlord Actual, Eagle 1-3 Tally two technicals South."

CB10. Common Acknowledgements

- Roger : You **heard** the transmission. (Rog)
- Copy : You **heard** and **understood** the transmission.
- Wilco : You **heard, understood** and **will comply** with the transmission.
- Negative : False/No/Wrong
- Affirmative : True/Yes/Correct
- Positive : True/Yes/Correct
- Standby : **Wait** for further information.
- Repeat your last : Request the **previous message** again.
- Say/Come again : Request the **previous message** again.
- Can't comply : **Cannot comply** to the transmission.

CB11. Position Reporting

Transmitting 3-figure/6-figure or relative position location over the radio when required.

CB12. Movement Reporting

Reporting useful movements like “halting” “moving up” are important ways to notify your friendlies about your next movements to avoid complication.

CB13. Contact Reporting

Reporting contact/hostiles. Standard format: 3 D's Direction, Distance and Description. *Though these are not fixed format to transmit, it just best represents the method.*

CB14. Requesting Information

A combatant should understand that **asking is preferable to guessing.**

Standard ways to request information:

- Requesting permission-to-speak.
- Command, Alpha-02: Requesting instructions.
- Command, Alpha-02: Requesting destination.
- Command, Alpha-02: Requesting clarification. And so on...

CB15. Re-reading or Confirmation

When transmitting important information or evaluation, it is essential to repeat it to avoid.

For example:

Command, Alpha-02: Move to checkpoint four.

Command, Alpha-02: Confirm checkpoint four.

Alpha-02, Command: Affirm.

CB16. Radio Discipline

CB16A. Do's

- Identify the station. Identify yourself.
- Speak clearly and concisely.
- Listen before transmitting.
- Acknowledge transmissions from other parties.
- Report relevant information.
- Use **PTT (Push-To-Talk)**

CB16B. Don't's

- Talk over/interrupt other transmissions.
- Spam the radio.
- Unwanted/irrelevant transmissions.

APPENDIX 'D'

Movement & Formations

DC17. Purpose

Formations help organize elements into well structured groups to avoid complications.

Combatants should:

- Maintain assigned position.
- Follow commands.
- Keep reasonable spacing.
- Avoid overtaking or falling far behind.
- Regroup when separated.
- Transition between formations when ordered.

DC18. Individual Movements

{Basic computer movements} : W, A, S, D for moving Forward, Left, Backward and Right respectively.

Keep spacing of about 1m or more when moving across an open ground or under possible mortar attack to minimize the number of possible casualties.

DC19. Section Formations

Formation is a standardized arrangement of combatants to maintain an organized team/section movement depending on the scenario.

Some common formations include:

1. STS (Shoulder-To-Shoulder)

It just means stating side by side while facing the leader/host/senior officer. This is an administrative formation, meaning it is only for ceremonial/training or non-combat situations.

2. Line

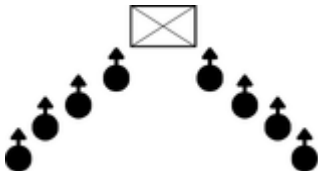

It is similar to STS but the only difference being that this is a battle formation. One can draw their weapons. It is used to provide maximum fire power towards the front.

3. File and Double File (Respectively)

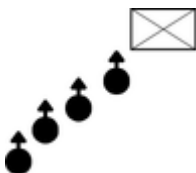

File/double file is used when you have narrow space or an open space or moving through dense vegetation.

4. Wedge Formation

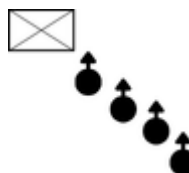

Best all-around formation; 360° awareness and mutual support

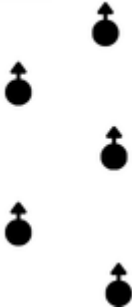

5. Echelon Left and Echelon Right (Respectively)

Emphasizes left/right flank.

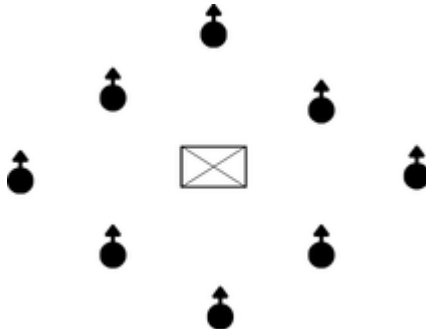

6. Staggered Column

For movement while maintaining wider dispersion and flank security.

7. Diamond Formation

Provides 360 deg protection for a small element.

APPENDIX 'E'

Individual Combat Fundamentals

ED20. Weapon Control

1. Muzzle Control

Always point the barrel of the firearm away from anything you **DO NOT** intend to destroy.

2. Trigger Discipline (In respect to game)

Keep your **finger off the trigger** until you are ready. In our case, away from your Left-Mouse Button (LMB)/ Any key assigned.

3. Range Officer/NCO

The person hosting the training/exercise session takes over as the Range officer. In a range/firing-drill session, the Range Officer is the **Highest authority** outranking everyone including the Commander, KSOL.

It is range officer's responsibility to ensure **safe and professional environment** in the range.

4. Hot and Cold Range

Hot range means when '**active-firing**' protocol, and Cold range means '**no firing allowed**' protocol is effective. This is controlled by the range officer/NCO.

ED21. Basic Iron Sights Marksmanship/Firing-Drill

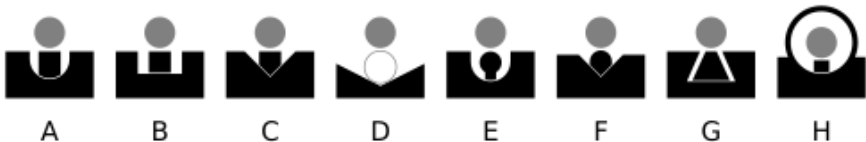

1. Iron Sights

Iron sights come in all shapes and types but generally they consist of a **Foresight tip** and a **rearsight/aperture hole**.

2. Three major types of Iron Sights

a) Open Sights

- a Open sights use rear sights with **groove or notch** rather than hole. The firer aligns the target, foresight tip/knob and the rear sight notch/groove to shoot.

b) Peep or Aperture Sights

Aperture sights use rear sights with small circular hole also called '**Aperture hole**'. The firer looks through the aperture hole and centers the foresight knob to fire.

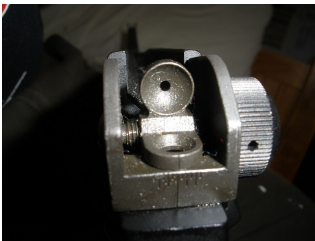

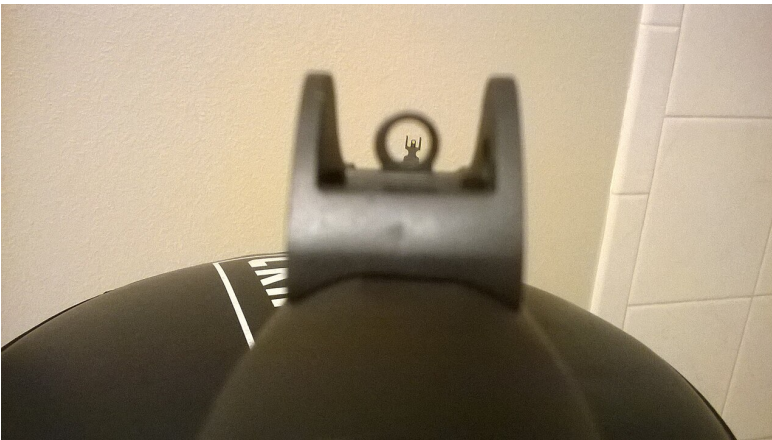

Fig.: An image of aperture sights of an M16 rifle.

Fig.: Diopter sights of a Sig Sauer rifle
(a type of aperture sights)

c) Ghost Ring Sights

It is also another type of aperture sights which uses a large, thin ring rather than a small rear aperture hole. The wider opening allows quick target acquisition while still providing more precise alignment than an open notch.

ED22. Basic Cover and Concealment

1. Cover Vs Concealment

In simple terms, cover is an object or a structure which can **prevent projectiles**. It's purpose is to provide protection and tactical advancement. Used to engage or observe safely.

Examples include: walls, car engine blocks, packed earth.

However, concealment is anything that hides you from getting spotted, but **does not** provide cover from any projectile. Its purpose is to prevent getting detected. Used to move unseen, avoid detection, and gain element of surprise.

Examples include: curtains, shrubs, shadows, fabric.

2. Using Cover to Advance

A combatant is expected to move between cover-to-cover when advancing towards enemy positions. This prevents from taking casualties from enemy burst fires, or getting detected. This effectively reduces threat, casualties and increases awareness.

APPENDIX 'F'

Basic Maneuvers

FE23. Purpose

Basic maneuver introduces combatants to controlled **team movement, coordination**, positioning and other actions conducted as a team/section or element during an operation.

FE24. Movement Control

Combatants should:

- Maintain the assigned position and spacing.
- Follow commands of the element leader.
- Have awareness of friendlies and their position.
- Have awareness of hostiles and their position.

FE25. Halt

On command of Halt, combatants are expected to **stop any movement** and stay in their assigned position and wait for further commands. Often recommended to crouch down or go prone to avoid detection.

FE26. Contact

When contact is identified, combatants should:

- Report contact
- Move to cover/concealment. Often ideal together.
- Follow element leader's command and avoid individual actions unless instructed.

FE27. Bounding Movement

Bounding is a coordinated movement of an element while other element maintains observation and security.

Moving element: Advances to the next position/cover.

Supporting element: Provides observation and security until ordered to move.

FE28. Regrouping

When combatants separate from each other/ when ordered to regroup, they should move to a designated rally point or rejoin their elements' leader.

“MEN APART, EVERY MAN AN EMPEROR”
