

CLOSE QUARTERS BATTLE COURSE MANUAL

THIS PAGE IS INTENTIONALLY LEFT BLANK

MILITARY TRAINING COMMAND

Kali Special Operations Legion, Headquarters

Foreword by the Commander

1. PURPOSE

Document KSOL-CQ 4-1A (Close Quarters Battle Course Manual) provides a detailed insight of Close Quarters Combat drills and principles that rule the fate of win or loss.

2. SCOPE

This document covers the fundamentals and standard procedures of Close Quarters Battle, including CQB and MOUT concepts, team composition and responsibilities, stack formations, room-entry methods, hallway and intersection clearance, staircase and stairwell procedures, corner observation and information gathering, slicing the pie, communication and situational awareness, complementary equipment, and standardized CQB terminology and communications.

APPENDIX 'A'

Introduction

AA01. CQB & MOUT

Close Quarters Combat (CQB) refers to combat in close distances usually in confined spaces like indoor stadiums, buildings, etc. It emphasises on situational awareness, rapid decision-making, coordination, communication and controlled movements.

Military Operations on Urban Terrain (MOUT) refers to operations in developed urban environments including street, buildings, alleys, compounds, etc. MOUT emphasises coordination, observation, security and engagement across complex urban settings.

AA02. Fundamentals of CQB

Close Quarters Battle relies on these fundamentals which are to be kept in mind at all times:

- **Situational Awareness:** Combatant must be aware of his surroundings, exit/entry points, escape routes, etc. Situational awareness is to be maintained without compromising the combatants assigned role/responsibility within the element.

- **Sector Responsibility:** Each combatant is assigned a responsibility of sector. Combatants must indivisibly focus on their sectors while avoiding unnecessary interference with other's sector.

- **Communication:** Communications should be clear and concise amongst the combatants. *Other information were provided in Basic Training Course.*

- **Controlled Movement:** In confined spaces controlled and precise movements are indivisible, while keeping exposure as minimum as possible.

- **Team Cohesion:** CQB is conducted as a team/element, every combatant is assigned a task and responsibility no less than the other. Combatants should focus on their responsibility and sector, be aware of friendlies and hostiles nearby, capacity to make team-wide and team adjacent decisions and movements.

- **Following Instructions:** Combatants are expected to follow assigned instructions and responsibilities in a smooth and considerate manner.

AA03. Team Composition

Usually the clearing team can consist 2, 4/5, and 8/9 men but in KSOL **each clearing team will consist of 5 men**, since our fire teams are divided in such manner already. Numbered 1, 2, 3, 4 and 5.

Standard assignments:

#1 – Point

#2 – Rifleman

#3 – Team Leader

#4 – Breacher

#5 – Rear

Breacher will move up when he's required to breach and then move back behind team leader.

Elements move in in a compact column called “**stack**” where the separation between man and man is minimal. The "stack" must be **adhered without to delay** as much as possible the entry located by the member in charge of the formation.

APPENDIX 'B'

Standard Procedures

BA04. Types of Stack

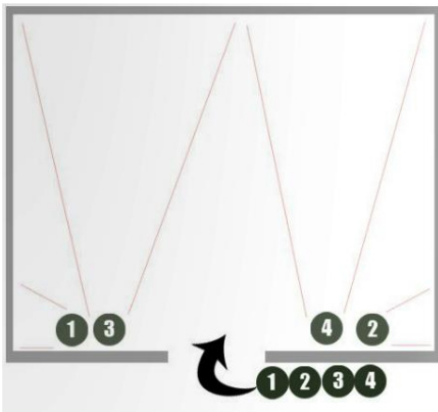

BA04 A. Single Stack

Single stack is the order referring to combatants forming up on one dominant side of the door (*usually the doorknob side*).

BA04 B. Double Stack

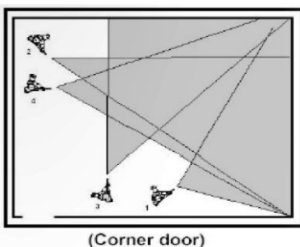

Double stack formation is where combatants make simultaneous entry from both sides of the door.

BA05. Common Entry Methods (Single Stack)**BA05 A. Online**

In this method of entry, combatants stay stuck to one side of the door and make entry in odd positions as you can see in the image.

The above image is compatible for doors at the center of the room. 1 goes first to one side, 2 to the other side, 3 follows 1, 4 follows 2 and 5 remains outside watching the rear.

For understanding, we can simply say that every combatant moves to the opposite side of the combatant in front of them.

(Corner door)

For corner doors however the same cannot be done. Here, One pair (Usually 1,3) will move up the room while the other pair (2,4) will clear the immediate corner.

Pros: It is perfectly defined area, easy to implement.

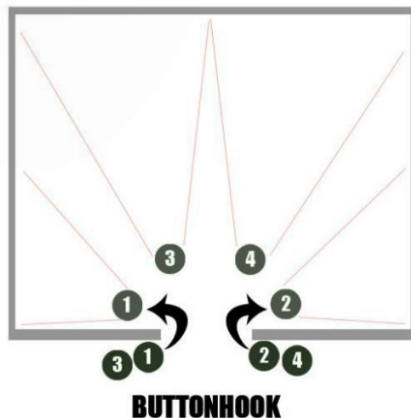

Cons: Tape.

BA06. Common Entry Methods (Double Stack)

BA06 A. Bottonhook (Simultaneous)

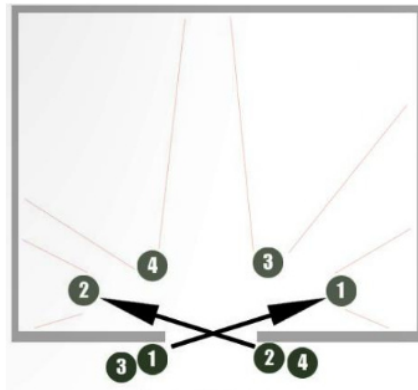

If the entry is large enough or the attackers have experience, this technique is very useful. As we see in the image, it follows the logical ordering of odd numbers on the left and even numbers on the right.

1 and 2 clear the blind spots while the rest clear the remaining room.

BA06 B. Crossover

The units will alternate, that is to say, first 1, then 2, followed by 3, and ending with 4. Initially, the positions are odd on the left and even on the right, but within each unit take the opposite position 1-3 to the right 2-4 to the left, as can be seen in the photo.

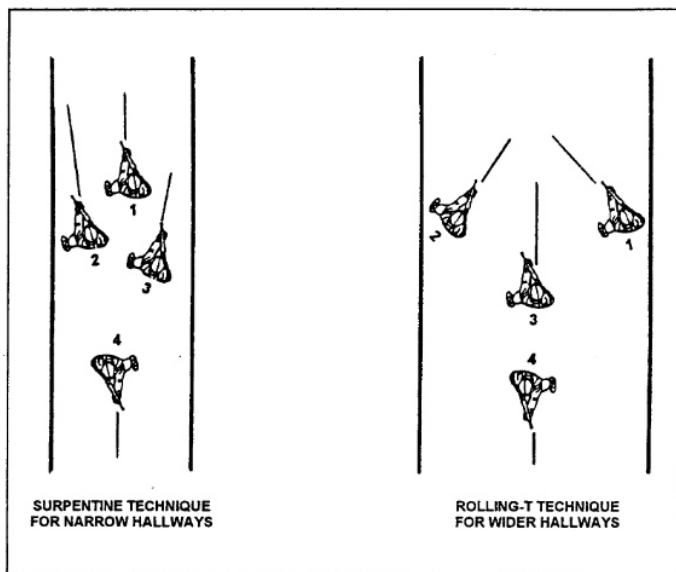

BA07. Techniques of Clearing Hallway**BA07 A. Serpentine Technique**

The serpentine technique is used for **narrow** hallways.

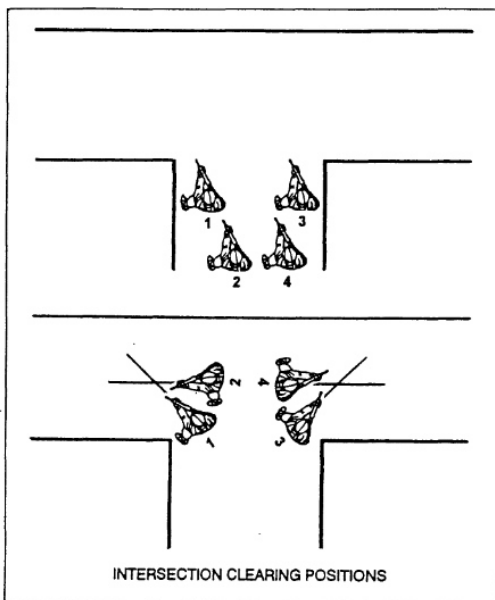

BA07 B. Rolling-T Technique

The rolling-T technique is used for broader hallways. The number 1 and number 2 men move abreast, covering the opposite side of the hallway from the one they are walking on. The number 3 man covers the far end-of the hallway from a position behind the number 1 and number 2 men, firing between them. Once again, the number 4 man provides rear security.

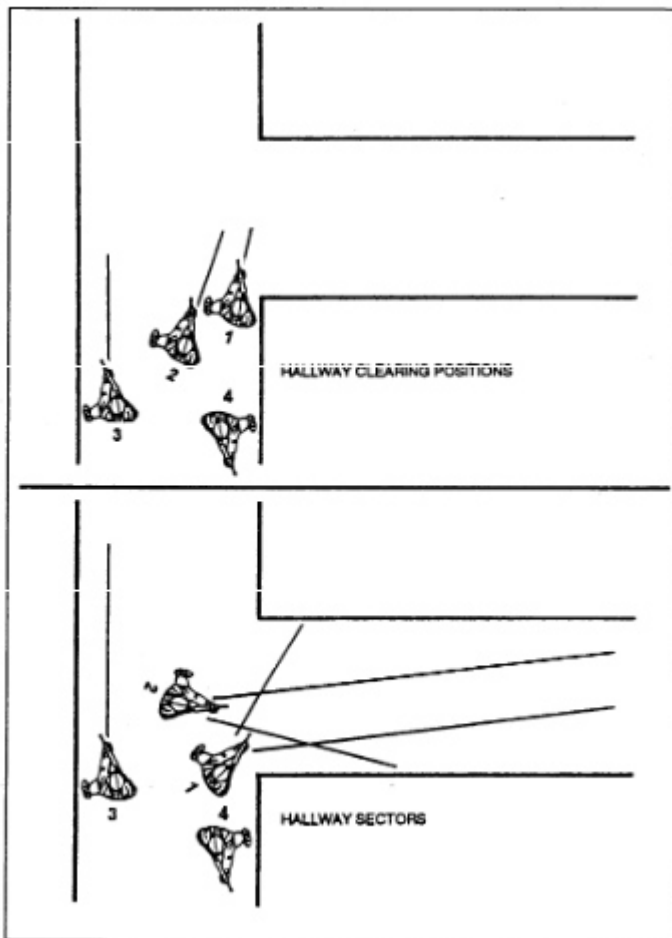

BA08. Clearing Intersections**BA08 A. 'T' Intersections**

The team is organized into pairs of 2, with teams 1 and 2, 3 and 4. 1 and 2 will clear to one side and 3 and 4 to the opposite. When a corner is cleared if necessary use the left hand if possible. Numbers 1 and 3 will border the nearest corner to them, using the crouched or kneeling position. At the signal, numbers 2 and 4 will clean the farthest wall, each towards the opposite side of their partner. The action zones overlap, but with several members crouching, it prevents crossfire. Once cleared, it returns to normal formation.

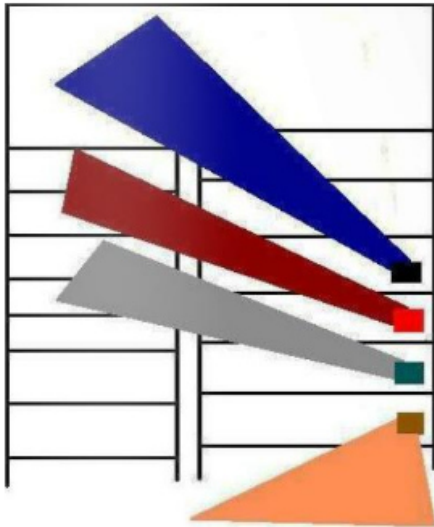

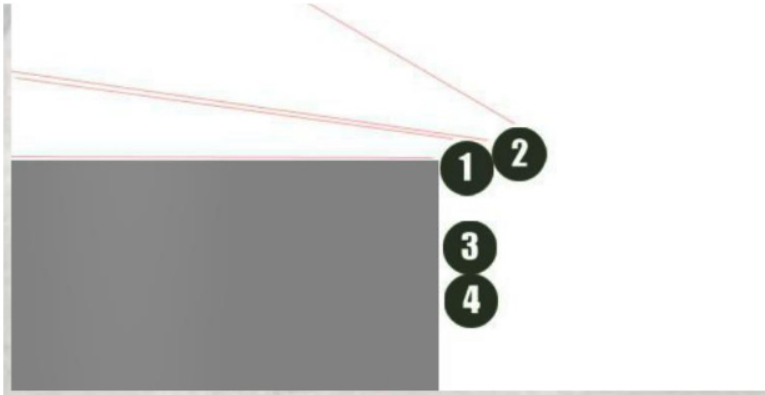

BA08 B. Crossed 'T' Intersection

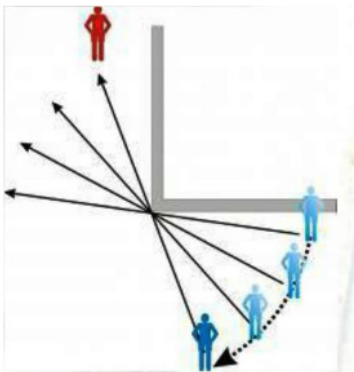

BA09. The Staircase & Stairwell

It is one of the most difficult points of 'CQB', both ascending and descending stairs is will be carried out **as close to the wall as possible** to avoid gunfire from lower floors or superiors, we must ascend stealthily and step by step, watching for trip wires. It's normal for number 1 to always have a front view to see what's between the plants and have an overview of the height or upper elements, number 2 will cover above in case there is someone pointing on the upper floor, number 3 will point at the stairs and number 4 will cover rear guard.

BA10. Gathering Corner Info

In situations where corners are extremely dangerous, the element forms a stack and sticks to the wall, ***while 4 providing rear security at all times***. 1 and 2 or just 1 peek from the corner and slice the pie to **gather as much information** as possible without completely exposing themselves as a duo.

BA11. Slicing The Pie

Slicing the pie is a method to clear a corner or other visual obstruction gradually exposing & observing small sections a time.

This is to be done slowly in a speed the combatant is comfortable. ***Take as much info at once that you can process.***

11 September 2026

BA12. Communication & Awareness

Communication is key but during a CQB situation, communication is a lifeline. It is important for comnatants to communicate before they take actions to avoid: mistaken acts/assumptions, miscalculated decisions, vague translation of idea, chaos, and jeopardized operation.

DO CHECK THE GLOSSARY IN APPENDIX 'C'.

BA13. Complementary Equipments

**AI Notice: A small fraction of BA13 is an excerpt from AI.*

BA13 A. Shotguns: Breaching Tool

Shotguns in general are easy, quick and effective method to breach merely fortified entry points. As for in-game logic, (as of now) shotguns can be used to fire at the doorknob to open a locked door ajar.

BA13 B. HE/Frags: Destruction/Area Denial

HE: High explosive; Frag: Fragmentation grenades. HE/fragmentation grenades are used when the objective is to damage or neutralize hostile personnel within an enclosed or confined area, or to deny an area to the opposing force. They are primarily offensive munitions and should only be used when the intended area and presence of friendly personnel have been positively assessed.

BA13 C. Smoke Grenades: Obstruction/Concealment

Smoke is used to obscure observation and reduce the enemy's ability to observe friendly movement. It may also be used to mark a location or communicate a planned point of movement, depending on the scenario.

BA13 D. Flashbangs: Disorientation/Entry

Flashbangs are used to temporarily disorient hostile personnel within a confined area, creating an opportunity for the element to enter and gain control of the room. Their use is most appropriate when a hostile presence has been identified or reasonably established and the element is prepared to act immediately.

BA13 E. Breach Charges: Breaching Tool

Breach charges are small amount of explosives which can be placed or secured on doors to blow up the obstruction or locked entry points. **Highly effective** for breaching reinforced doors.

APPENDIX ‘C’
Glossary

CB14. Common CQB Vocabulary

1. General CQB Terms

Term	Meaning
CQB	Close Quarters Battle; combat conducted at short range in confined environments.
CQC	Close Quarters Combat; broader term for close-range combat.
MOUT	Military Operations on Urbanized Terrain.
Urban	Built-up environment containing buildings, streets, alleys, compounds, etc.
Element	A group of personnel operating together as a unit.
Clearing	Systematically checking an area for threats and hazards.
Clear	Indicates that an area has been checked and no threat is currently identified.
Sector	A designated portion of an area for a member to observe/control.
Sector of Responsibility	The specific area assigned to a member for observation or security.
Threat	A hostile or potentially hostile person/object.
Contact	A threat or other significant observation has been identified.
Unknown	Something observed but not yet positively identified.

Term	Meaning
PID	Positive Identification; confirming what a person/object actually is.
Friendly	A member of your own force/team.
Hostile	An identified enemy/threat.
Dead Space	An area that cannot currently be observed or effectively covered.
Blind Spot	An area hidden from a person's current view.
Fatal Funnel	A confined area where personnel entering are particularly exposed to threats; commonly associated with doorways and other chokepoints.
Chokepoint	A restricted passage through which movement is concentrated.
Threshold	The immediate area at the entrance of a room/opening.
Dominant Side	The side of an opening or corner from which personnel are positioned/operating.
Near Side	The side closest to the individual or element.
Far Side	The side opposite the individual's current position.

2. Stack & Formation Vocabulary

Term	Meaning
Stack	Personnel positioned sequentially outside an entry point.
Single Stack	Personnel positioned primarily on one side of an entry point.
Double Stack	Personnel positioned on both sides of an entry point.
Point	Lead member of the element.
Lead	The member currently leading movement.
Rear	Member responsible for security toward the rear of the element.
Breacher	Member responsible for dealing with an obstacle/entry barrier.
Team Leader (TL)	Member responsible for directing the element.
Second Man	Member immediately behind the point.
Follow-on	Personnel following the lead element.
Tail	Rearmost member of an element.
Column	Personnel moving sequentially behind one another.
File	A line of personnel moving one behind another.
Interval	Distance between personnel or elements.
Spacing	Physical separation maintained between personnel.
Flow	Continuous movement of personnel through an entry or area.

Term	Meaning
Re-stack	Reorganizing personnel into the required stack after movement or disruption.
Reorganize	Returning the element to its required positions/responsibilities.

3. Corner & Observation Vocabulary

Term	Meaning
Slice the Pie	Gradually expose and observe an area around a corner rather than exposing the entire body at once.
Pie	The progressively revealed sections of an area during slicing.
Slicing	The act of progressively observing an obscured area.
Corner Check	Checking an obscured corner before committing to the area.
Peek	Briefly exposing a small portion of the viewing position to obtain information.
Visual Clearance	Confirming that an area has been observed sufficiently to proceed.
Angle	The portion of an area currently visible from a particular position.
Sector Check	Deliberately observing an assigned sector.
Observation	Gathering information about the surrounding environment.

Term	Meaning
Overwatch	Providing observation/security for another element from a supporting position.
Cover	Protection from hostile fire.
Concealment	Protection from observation but not necessarily from fire.

4. Entry Vocabulary

Term	Meaning
Entry	Movement into a room or structure.
Immediate Entry	Entering immediately after reaching the entry point.
Entry Point	Location used to enter an area or structure.
Doorway	Opening providing access through a wall or structure.
Center-Fed Room	Room where the entry point provides access toward the central portion of the room.
Corner-Fed Room	Room where the entry point is located near a corner.
Buttonhook	Entry movement in which personnel turn toward the near side of the entry.
Crossover	Entry movement where personnel cross toward the opposite side of the room/entry.
Online	Personnel align along one side of an entry point before moving through.
Threshold Clearance	Checking/controlling the immediate area around an entry point.
Room Flow	Continuous movement of personnel into and through a room.
Room Dominance	Establishing control of a room after entry.
Room Complete	Indicates the room has been cleared to the required standard.
Exit	A route leading out of the room/structure.

Term	Meaning
Secondary Exit	Additional exit or route from an area.

5. Building/Interior Vocabulary

Term	Meaning
Hallway / Corridor	Passage connecting rooms or areas.
Stairwell	Area containing stairs between levels.
Landing	Flat area at the top, bottom, or between sections of stairs.
Intersection	Point where two or more corridors/paths meet.
T-Junction	Three-way corridor intersection.
L-Junction	Corner where a corridor changes direction.
Dead End	Corridor or route with no forward exit.
Window	Opening in a wall that may provide observation/access or present a threat area.
Opening	Any passage or breach in a wall/structure.
Stair Security	Maintaining control of a stairway while moving between levels.
High Side	Upper portion/level of an environment requiring observation.
Low Side	Lower portion/level requiring observation.
Multi-Level Structure	Building containing multiple floors or elevations.

6. Movement Vocabulary

Term	Meaning
Move	Begin movement.
Hold	Remain in the current position.
Halt	Stop movement.
Push	Continue advancing.
Follow	Maintain position behind the designated member.
Shift	Move position laterally or otherwise adjust position.
Cross	Move across another member's sector/path after coordination.
Collapse	Move toward a designated point or consolidate the element.
Regroup	Reform the element after movement/disruption.
Maintain	Continue maintaining the assigned position/task.
Rear	Indicates attention/security toward the rear.
Left / Right	Directional movement or observation instruction.
Up / Down	Movement toward a higher/lower level or position.

7. Breach Vocabulary

Term	Meaning
Breach	Creating or using an opening through an obstacle.
Breacher	Person assigned the breaching responsibility.
Breacher Up	Breacher moves into position to perform the breach.

Term	Meaning
Breaching	Breach is being performed/in progress.
Breach Complete	Breach has been completed and the opening is available.
Obstacle	Object or structure preventing or restricting movement.
Forced Entry	Entry through an otherwise secured/blocked access point.
Mechanical Breach	Breach using mechanical means/equipment.
Entry Point	The opening through which the element enters.

8. CQB Communications

Communications section:

Basic

- **STACK**
- **SET**
- **READY**
- **HOLD**
- **MOVE**
- **HALT**
- **CLEAR**

- **CONTACT**
- **UNKNOWN**
- **FRIENDLY**
- **REAR**
- **LEFT**
- **RIGHT**
- **UP**
- **DOWN**
- **CROSSING**
- **CROSS**
- **FOLLOW**
- **REGROUP**

Breach

- **BREACHER UP**
- **BREACHING**
- **BREACH COMPLETE**
- **ENTRY**
- **HOLD ENTRY**

Room

- **ENTER**
- **CLEAR**
- **ROOM CLEAR**
- **ROOM COMPLETE**
- **EXIT**
- **NEXT ROOM**
- **HALLWAY**
- **STAIRS**
- **CORNER**
- **CONTACT LEFT**
- **CONTACT RIGHT**
- **CONTACT FRONT**
- **CONTACT REAR**

Equipment

- **FRAG OUT** — fragmentation grenade deployed.
- **FLASH OUT** — flashbang/stun grenade deployed.
- **SMOKE OUT** — smoke grenade deployed.

Term	Meaning
Situational Awareness	Maintaining awareness of the environment, personnel, threats and changes around the element.
Target Identification	Determining what a person/object is before acting.
Sector Responsibility	Maintaining control/observation of an assigned sector.
Cross Coverage	One member covering an area while another performs a task.
Mutual Support	Personnel supporting one another through complementary responsibilities.
Team Cohesion	Maintaining coordinated movement and actions as an element.
Weapon Discipline	Maintaining safe and controlled weapon handling.
Muzzle Discipline	Preventing the weapon from being pointed at friendly personnel or unsafe areas.
Trigger Discipline	Keeping the trigger finger outside the trigger guard until engagement is required.
Fire Discipline	Controlling when and where fire is used.
Positive Identification	Confirming a target's identity before engagement.
Controlled Movement	Moving deliberately while maintaining assigned responsibilities.
Overexposure	Exposing more of the person/element than necessary.

Term	Meaning
Minimize Exposure	Reducing unnecessary exposure to observed or potential threats.
Information Gathering	Obtaining and communicating relevant information before and during movement.
Decision Point	A point where the element must determine its next action based on available information.
